PROFESSIONAL SUMMARY

Results-driven **Senior Flutter Developer & Mobile Architect** with over 4 years of proven commercial experience building high-performance, secure, and scalable cross-platform mobile applications. Proven track record leading enterprise fintech platforms handling millions of transactions, as well as 0-to-1 product ventures achieving strict Google Play Store production approvals. Expert in Dart, Clean Architecture (BLoC, Riverpod, MVVM), hardware-backed security (SSL Pinning, Biometrics), offline-first delta synchronization, and automated CI/CD deployment pipelines.

PROFESSIONAL EXPERIENCE

Veroke — Sr. Flutter Developer

07/2025 – Present

- Architect and maintain high-concurrency enterprise Flutter applications for Saudi Arabian and Middle Eastern corporate clients, ensuring full compliance with regional financial and data governance regulations.
- Engineer resilient RESTful API layers, background synchronization workers, and real-time state listeners for seamless cross-border data continuity.
- Spearhead code quality initiatives, modular component architecture, and memory profiling to maintain 60 FPS performance across diverse Android and iOS devices.
- Collaborate closely with distributed multi-disciplinary engineering squads across timezones to accelerate release cadences.

Apex Mobile Labs — Founder & Principal Mobile Architect

2023 – Present

- **Auralarm (Production Approved on Google Play Store):** Architected a smart mission alarm and sleep tracking platform from 0 to 1 in Flutter; solved Android 14/15 battery-optimization survival via custom foreground audio channels; successfully directed the mandatory 20-tester 14-day closed testing track and secured direct Google Production Approval.
- **Formality (Minimalist Wardrobe Architect & Daily Stylist):** Designed a decoupled cross-platform architecture with local SQLite/Isar caching, AI vision batch-capture ingestion, and delta synchronization.
- **BabyBloom (Parenting & Developmental Leap Tracker):** Engineered a multi-caregiver real-time sync system with predictive nap/awake windows and WHO growth percentile curves.
- Formulated and deployed end-to-end Fastlane and GitHub Actions CI/CD automation pipelines for multi-track store distributions.

Evamp & Saanga (Working with Axian Group Limited) — Flutter Developer

07/2023 – 07/2025

- Spearheaded core mobile development for flagship Fintech super-applications (**Mixx by Tigo, Mixx by yas, TMoney**) serving millions of active banking and mobile money users.
- Enforced rigorous enterprise security standards, including SHA-256 SSL/TLS certificate pinning, biometric authentication (FaceID/Fingerprint), and encrypted on-device storage.
- Designed and implemented real-time multiplayer interactive features using WebSockets and Firebase Cloud Messaging.
- Established comprehensive automated testing suites (unit, widget, and integration tests) that improved overall code coverage and minimized post-release regression defects.
- Partnered with banking API architects, UI/UX design leads, and security audit teams to ensure friction-free KYC and payments.

Sigi Technologies — Flutter Developer

06/2022 – 06/2023

- Developed and shipped multiple cross-platform mobile apps for Android and iOS using MVVM, MVP, and Clean architectures.
- Integrated payment gateway SDKs (Stripe, local payment processors) and engineered reliable transaction processing workflows.
- Optimized asynchronous data flow and state management, reducing app startup latency by over 30%.

AndroWeb IT Solution — Flutter Developer

05/2021 – 05/2022

- Built commercial mobile applications from scratch, focusing on responsive UI implementation and memory optimization.
- Integrated Google Maps SDK, geolocation tracking, camera APIs, and Firebase Cloud Messaging for push notification campaigns.
- Maintained clean, modular codebase architecture ensuring rapid feature delivery and high scalability.

TECHNICAL SKILLS & EXPERTISE

Core Mobile Tech:	Flutter, Dart, Android (Java, Kotlin), iOS (Swift), Method Channels, Custom Renderers
Architecture & State:	Clean Architecture, BLoC, Riverpod, Provider, MVVM, MVP, Repository Pattern, Freezed
Security & Fintech:	SSL Pinning, Biometric Authentication, Encrypted SharedPreferences, JWT, Payment Gateways
Data & Storage:	SQLite, Isar, Hive, Drift, Firebase (Firestore, Auth, Storage, Cloud Messaging), Supabase, REST, WebSockets
Testing & DevOps:	Unit Testing, Widget Testing, Integration Testing, Mocktail, Fastlane, GitHub Actions, CI/CD Pipelines
Tools & Platforms:	Git, GitHub, Bitbucket, Google Play Console (Closed/Open Testing), TestFlight, App Store Optimization (ASO)

EDUCATION & CREDENTIALS

COMSATS University Islamabad, Attock Campus — Bachelor of Science in Computer Science (BS CS) 2018 – 2022

- **German Anabin Database Recognition: Status H+** (Equivalence to German Higher Education Degree).
